

DESIGN • BUILD • LIVE

C.A. McCarty  
CONSTRUCTION, LLC

At C.A. McCarty Construction, our primary goal is to ensure that your home is built the way you want! We personally meet with you each step of the way; from your ideas and requirements, to the design and concept, as well as the budget. Together we complete each phase to build the house that will become your home.

C.A. McCarty Construction understands that building a home can be overwhelming. We aim to take the stress out of the process by coordinating each step for you. Once you express your ideas, we will submit them for a design. When the design is complete, we will work together to choose colors and finishes that fit your lifestyle. Finally, we work to keep you within your budget while ensuring quality materials and workmanship.

C.A. McCarty Construction stays up-to-date with building practices, building codes, and innovative products. We strive to use innovative, environmentally conscious, and economic practices in each home we build. At C.A. McCarty Construction, our goal has never been about how many houses we can build, but rather how well we can build homes.

C.A. McCarty Construction believes your home should be the perfect reflection of you and your family. After all, you're unique....shouldn't your home be too?

F U N C T I O N   &   S T Y L E

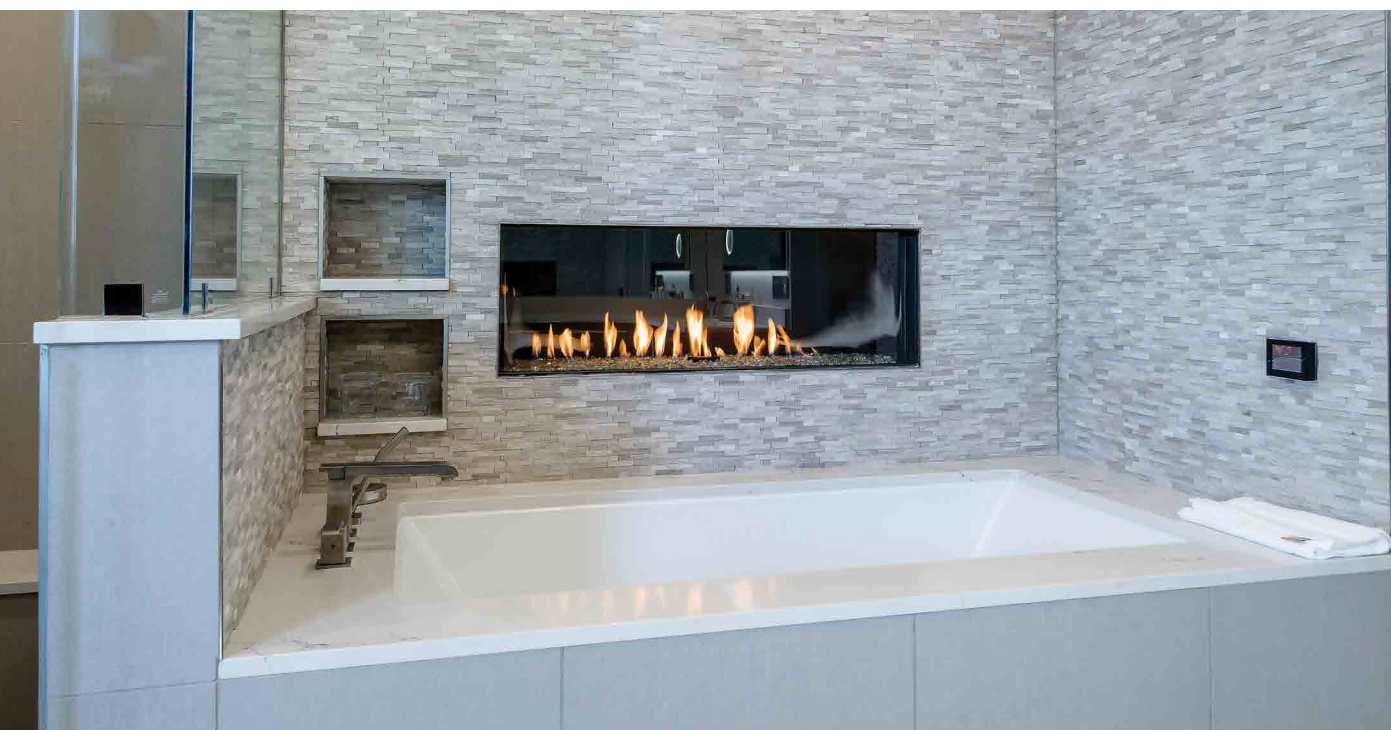

# — SAFETY • SATISFACTION —

C.A. McCarty Construction places a high importance on safety, construction, and satisfaction. C.A. McCarty Construction was the first in Oklahoma to build a complete high-wind resistant home. For this project, we partnered with FEMA, Oklahoma State Home Builders Association, Simpson StrongTie, Owens Corning, and State Farm Insurance. C.A. McCarty Construction was also the first builder to institute high-wind construction practices within the base of a home. With these added features, it decreases possible damage to your home and increases your peace of mind in the event of high wind storms or tornadoes.

C.A. McCarty Construction is a Certified Professional Builder as well as a Certified Green Professional Builder. What does this mean to you? Improved air quality in your home, lower utility bills, and a smaller 'footprint' on the earth.

C.A. McCarty Construction supports and promotes the community we live in. Curtis McCarty is active with the Oklahoma State Home Builders Association, the Norman Chamber of Commerce, the Oklahoma Uniform Building Code Commission, Board of Adjustments for the City of Norman, and past Norman Planning Commissioner.

# TESTIMONIALS

Choosing C.A. McCarty Construction to build our new home was the best decision we ever made. We had a wonderful experience building our home with Curtis McCarty. He is a very professional, knowledgeable builder and had many innovative ideas for our 'dream home'.

From the beginning, we have wanted to create a house that is unique in our own, plain way, but still quite spectacular... You have been a tremendous help to achieving this goal... your vision and ideas for the cabinets, trim and many 'little things' we never even thought of make a big impact on the house. We are really going to love living there. Thanks for being a great partner in this!

## Signature Custom Pools

A beautifully designed pool is only as enjoyable as its construction quality. Signature Custom Pools is consistently recognized for our superior level of swimming pool construction. By always combining the best elements of design, along with technical expertise and a hands on approach, we build our pools to provide our clients with years of virtually carefree enjoyment.

We named Signature Custom pools for this reason: you can make your mark in your back living space in your own way. The way we design is totally based on your wants and the way your space is laid out. Cookie cutters are something you use in the kitchen, not in your back living area.
